## **FOSE 2010 Conference** – *Earn CEUs*

**We bring knowledge, expertise, and guidance in classroom settings, helping you fulfill agency goals and missions!**

### **Track 1: Information Management and Data Centers**

Gain insight on issues including: data infrastructure and management; tomorrow's data center; virtualization; cloud computing; knowledge management; disaster recovery; and more.

### **Track 2: Cybersecurity and Information Assurance**

What are the challenges of protecting information from theft, corruption, or natural disaster, while allowing it to remain accessible and productive as intended? Find out in this track!

### **Track 3: Next Generation Government: Gov 2.0 and Beyond**

Explore how government at every level is leveraging social media tools and Web 2.0 technologies to achieve transparency, participation, collaboration, and innovation.

### **Track 4: Defense Innovations - Presented with: Association for Enterprise Information (AFEI)**

Experts from the Office of the Secretary of Defense, Defense Information Systems Agency, Defense Manpower Data Center, and others will address your challenges as well as IT advancements and best practices.

### **Track 5: Breakthroughs and Best Practices**

Learn about new technologies, trends and policies that will change the way you, your agency, and the government at large do business.

### **And 6 Tutorials On:**

- Understanding Virtualization's Role in Auditing and Security
- The Law of IT Compliance: How to Conduct Investigations - Presented with the SANS Institute
- Social Media 101: Putting Social Media to Work for Your Organization
- Cutting-Edge Hacking Techniques - Presented with the SANS Institute
- DoDAF Version 2.0
- Forensic Fundamentals - Presented with the SANS Institute

### **And More!**

**GAIN A WEALTH OF IT KNOWLEDGE  
IN JUST TWO DAYS, JOIN YOUR COLLEAGUES  
AND ATTEND THE FOSE CONFERENCE 2010!**

## **FREE Education**

**Training budget cut?  
Use FOSE's FREE education sessions to get smarter!**

### **Cybersecurity Theater, sponsored by Accenture**

Experience the latest solutions to ensure a trusted and resilient information and communications infrastructure.

### **2nd Annual CloudCamp at FOSE**

The 2nd Annual CloudCamp at FOSE is an unconference where adopters of Cloud computing technologies exchange ideas. It is where you can share your experiences, challenges and solutions. You're encouraged to share your thoughts in open discussions with other government implementers, end-users and solutions providers.

### **Data Center and Virtualization Theater**

Modernization. Virtualization. Consolidation. Green Data Centers. Cover is all through education presented in this theater.

### **Defense Innovations Theater**

Innovative technology is critical to successfully winning our nation's wars, defending our homeland, promoting security and deterring conflict. It is essential that information is visible, accessible, understandable and trusted when meeting the anticipated and unanticipated needs of our military. Learn from those who have mastered this.

### **Government Solutions Theaters**

Featuring sessions on the GSA Alliant Program! You'll learn from industry experts as they share insights gained from working with other federal agencies and departments facing many of the same challenges you are.

### **What's Next in DNSSEC**

This day-long session will assess the federal response to securing its domains; examine challenges faced by agencies deploying DNSSEC; and share lessons learned and next steps as DNSSEC is deployed in other sectors, including .org, .edu, .com and government domains in other nations.

### **And More!**

## **FREE Expo**

**Explore targeted technology areas and thousands of cutting edge products from hundreds of exhibitors. Plus, network with a wealth of industry experts and peers.**

### **Cloud Computing Pavilion**

Visit the Cloud Computing Pavilion and see the technologies and services demonstrated by leading edge Cloud technology providers. Companies will be featuring cloud applications, Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS) and other products and services you need to successfully migrate to Cloud.

### **Cybersecurity Pavilion**

Discover the latest solutions to ensure a trusted and resilient information and communications infrastructure.

### **Data Center and Virtualization Pavilion**

Experience products and gain insights in to automated processes, managed risks, reduced costs, lowered downtime, strengthened security while providing access to data internally and externally.

### **GSA Alliant Program Pavilion**

Streamline your acquisition process! Get the best value IT solutions by visiting the GSA Alliant Program Pavilion.

### **What's Next in DNSSEC and the DNSSEC Pavilion**

U.S. federal agencies will have deployed DNSSEC, the security protection for the domain name system, by year-end 2009. This day-long session will assess the federal response to securing its domains; examine challenges faced by agencies deploying DNSSEC; and share lessons learned and next steps as DNSSEC is deployed in other sectors, including .org, .edu, .com and government domains in other nations.
